OPERATION: DEFEND THE NORTH

A Canadian Cybersecurity Readiness Exercise

siberX is excited to announce its 7th cybersecurity readiness table top exercise (TTX). This one day cyber breach simulation event will take place in Toronto, Canada on December 3, 2025 and is designed to strengthen Canada's cybersecurity readiness and response strategies.

This event brings together Public and Private sector stakeholders along with the Canadian Cybersecurity community to discuss how their organizations would respond to such an attack.

Participants, in real-time, will deal with an active incident and breach - collaborating with leaders from across Canada, technical and operational solutions will be proposed to contain the attack.

O Canada, we stand on guard for thee. Protégera nos foyers et nos droits.

PAST SPONSORS

siberX **OPERATION: DEFEND THE NORTH**

Julia Le Senior Manager Ontario Public Service

Maleena Singh Director of Incident Response Mirai Security Inc. **OPERATION: DEFEND THE NORTH**

TJ Odugbesan Director of Enterprise Security SaskEnergy

Michael Buckley Security Operations Center Lead Mark Anthony Group 4

Mary Carmichael President **ISACA Vancouver**

Sherry Rumbolt Senior Cybersecurity Strategist Treasury Board of Canada Secretariat

Enova Power

Richard Henderson Executive Director & CISO Alberta Health Services

Hardeep Mehrotara VP Information Security & Architecture **Concert Properties**

Manager of Cybersecurity Odlum Brown

BC Public Service

Vivienne Suen Distinguished Architect TD Bank

Chief Innovations Officer Mirai Security

Jillian Carruthers Assistant Deputy Minister & CTO

Ali Abbas Hirji VP Technology and Cyber Computek College and 369 Global

Parul Kharub Cyber Security and Tech Risk, Advisor and Business Partner **Teck Resources Limited**

Octavia Howell VP, CISO Equifax Canada Co.

AVP, CISO **PBC Solutions**

PAST ADVISORY BOARD

KEY HIGHLIGHTS

- Leaders from Critical Sectors Involved in Exercise: Energy, Financial, Healthcare, Government Services, Telecommunications and Retail.
- Simulated Cyber Attacks: Engage in sector-specific cyber threat scenarios
- **Expert-Led Sessions:** Technical and operational discussions with industry leaders real-time visualizations from an active environment will be incorporated
- Networking Opportunities: Connect with professionals across sectors and showcase.

EVENT OVERVIEW:

- Duration: Dec 3, 2025.
- Format: Cybersecurity Tabletop Event
- 9:00 am 6:30 pm Exercise and Networking
- **Objective:** Join professionals across sectors working towards protecting a cyber attack against Canada's critical sectors via a cybersecurity readiness exercise

DEMOGRAPHICS:

- **PUBLIC/PRIVATE SECTOR:** 50% public & 50% private sector viewing this online, expected attendance, 300 leaders in-person & 3,000+ online.
- **MEDIA:** Media has been invited and will partcipate in coverage (Globe & Mail, Toronto Start, Technology Media)
- **DIGNITARIES:** Minister of Public and Business Service Delivery, CIO & CISO Provinces, MPs Mayors, and Councillors invited to open each day and participate.

MODULE & SPONSORSHIP OPPORTUNITIES

West Coast Dead Zone

It's a typical rainy morning in Toronto. People are settling into their routines: students head to school and commuters navigate the busy highways and businesses open their doors for the day. Then at precisely 9:15 AM PST, everything changes. Mobile phones lose signal and internet connections drop and landlines fall silent. The province goes eerily quiet as people scramble to understand what's happening.

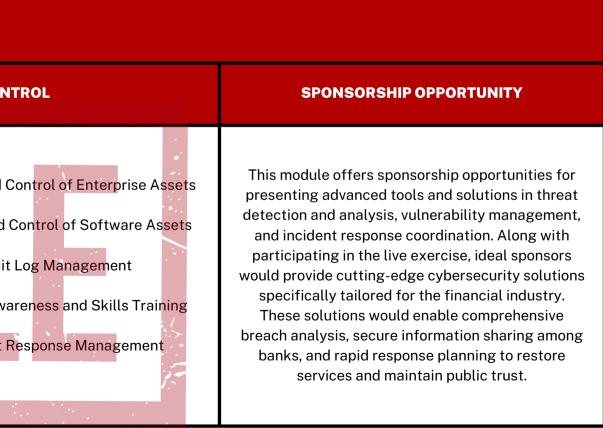

At first, the outage seems like a technical glitch. Local telecom providers suggest routine maintenance but as the minutes turn to hours, it's clear this is no ordinary disruption. By midday, the outage has affected every corner of the province from bustling Vancouver to remote northern towns. Emergency services are overwhelmed with calls reporting dead communication lines and businesses struggle to process transactions without internet or phone connectivity. Panic rises as families lose contact with loved ones and vital services like 911 dispatch face unprecedented strain.

It's not just Toronto's citizens affected; key industries reliant on constant communication from healthcare to transportation are in turmoil. Hospitals face delays as internal networks struggle to stay online while airlines operating out of YVR ground flights due to safety concerns. Government officials scramble to reassure the public but the absence of clear information only fuels speculation. Social media becomes a hotbed of conspiracy theories with #ONHack trending nationwide. Emergency broadcasts are limited to old-fashioned radio and long queues form outside gas stations and grocery stores as people stockpile essentials fearing the worst.

By late afternoon, cybersecurity specialists from across Canada are on the ground joined by federal agencies and the RCMP's cybercrime unit. Their challenge is immense: identify the attackers, contain the breach and restore service to millions of desperate residents. Each passing hour raises the stakes as ON's economy grinds to a halt and social unrest begins to simmer. The attack is a wake-up call highlighting just how fragile modern infrastructure can be - and how devastating a single vulnerability can become in the wrong hands.

CONTROL

SPONSORSHIP OPPORTUNITY

This module offers sponsorship opportunities for presenting advanced containment, threat isolation, and risk mitigation solutions during a cyber crisis. Ideal sponsors will provide cutting-edge tools for real-time threat detection, automated vulnerability assessment, and critical infrastructure security to ensure telecom networks remain resilient. Along with participating in the live exercise, sponsors will showcase innovative response technologies that enable rapid threat neutralization, secure backup communications, and operational continuity during outages.

ONTROL

This module offers sponsorship opportunities for presenting advanced solutions in threat removal, malware eradication, and secure system restoration. Ideal sponsors will provide cuttingedge tools for forensic analysis, endpoint protection, and vulnerability patching to eliminate persistent threats and restore telecom operations. Along with participating in the live exercise, sponsors will showcase innovative technologies for automated malware detection, network hardening, and secure infrastructure recovery.

This session explores the recovery phase, offering insights into maintaining data integrity, strengthening resilience, and ensuring cross-sector collaboration for future incidents.	5a. Finalizing Full Operational Restoration 5b. Reviewing Incident Response & Performance Assessment 5c. Addressing Public Trust & Communication Strategy 5d. Implementing Lessons Learned & Future Resilience Planning 5e. Formal Closure and Leadership Remarks	• CIS Control 7: Co Man • CIS Control 17: Incide • CIS Control 18:

CONTROL

SPONSORSHIP OPPORTUNITY

This module offers sponsorship opportunities for presenting comprehensive incident response, disaster recovery, and crisis management solutions. Ideal sponsors will provide cutting-edge tools for secure communications, breach response coordination, and business continuity planning to minimize downtime and restore public confidence. Along with participating in the live exercise, sponsors will showcase innovative solutions for incident tracking, real-time system monitoring, and cyber resilience enhancement.

CONTROL

SPONSORSHIP OPPORTUNITY

This module offers sponsorship opportunities for presenting strategic insights, post-incident analysis tools, and long-term resilience planning solutions. Ideal sponsors will provide cutting-edge platforms for forensic reporting, compliance management, and cybersecurity training to strengthen future incident preparedness. Along with participating in the live exercise, sponsors will showcase innovative approaches for lessons learned analysis, policy refinement, and crosssector collaboration to prevent future crises.

SPONSORSHIP OPPORTUNITY

Brand Exposure: Position your brand prominently before a diverse audience of industry leaders, cybersecurity professionals, policymakers, and tech enthusiasts via gamified purple teaming.

Thought Leadership: Showcase your expertise through expert-led sessions, workshops, panels, and discussions with industry leaders. **Branding Opportunities:** Gain visibility through branding placements across event materials, website, and promotional channels. **Recognition:** Acknowledgment as a key sponsor in event communications, press releases, and media coverage. **Community Engagement:** Support educational institutions and emergency services personnel by contributing to their practical insights and crisis management skills. Networking Opportunities: Connect virtually with professionals across sectors, fostering valuable relationships and potential partnerships.

WHO WILL ATTEND?

- Government Officials: Responsible for critical infrastructure protection, including policymakers, agencies, and representatives.
- Cybersecurity Professionals: Experts seeking sector-specific insights and hands-on experience in strategic cyber defence.
- Industry Leaders: Executives and decision-makers invested in safeguarding their respective sector.
- Private Sector Entities: Companies offering cybersecurity tools & solutions, to enhance national cyber resilience.
- Tech Enthusiasts: Individuals with a passion for technology and interest in addressing cybersecurity challenges through innovation.
- Educational Institutions: Students & faculty in cybersecurity programs, gaining practical insights and experience in simulated crisis scenarios.
- Emergency Services Personnel: Those responsible for managing crises, ensuring coordination and effective responses in the face of cyber threats.
- International Cybersecurity Collaborators: Professionals from allied nations, fostering cross-border cooperation and sharing insights on global cyber threats.
- Media and Communication Professionals: Reporters and communicators covering cybersecurity, contributing to public awareness and understanding.
- General Public: Engaged citizens interested in understanding the impact of cyber threats on national security and critical infrastructure.
